### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Priority***

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 1-14 are rejected under 35 U.S.C. 102(e) as being anticipated by Aoyagi et al. (Aoyagi) (US 5,982,999).

Aoyagi discloses a post card printing system that either explicitly or inherently discloses all of the claimed limitations of the current application as is evidenced by the fact that the post card printer of Aoyagi teaches a copying machine executing the processing for reading image data from a document of a particular size media and

processing the image data for printing the image data on a post card (a media of a smaller size), a computer for editing image data read by the copying machine to include resizing image data and choosing best layout. Which reads on the desired objective of the current to provide an image forming apparatus and an image forming method wherein it is possible to conduct image forming on a good working condition when forming images on a recording material whose area is greater than that of certain fixed-form size. (Please note: col 1, lines 7-15; col 21, line 7 – 23, line 67).

In the copy machine a horizontal synchronizing signal showing a maximum available image area from an image reference position in a main scanning direction, and a FGATE bar is a vertical synchronizing signal showing a maximum available image area from the image reference position (a read-starting position) in an auxiliary scanning direction, in which RGB data is read out from a document using a clock signal as a reference. Which reads on the control means being able to form the images on the recording material so that a central point defined with respect to the sub-scanning direction of the recording material may be on a central line that is perpendicular to the central line defined with respect to the images. (Please note: col 9, lines 28-63).
